Techni-Stat Introduces First 3-Layer Rubber Static Control Mat

Worcester, PA (March 2009) –Techni-Tool is pleased to introduce the industry's first 3-layer rubber static control mat, launching as part of the leading Techni-Stat line of ESD products.

Unlike 3-layer vinyl mats, this next generation Techni-Stat mat has a unique chemically-resistant rubber top that won't burn from hot irons. In addition, a lightly embossed pattern on the top layer reduces slippage. These .120" thick mats are the ultimate in soft, comfortable worksurfaces, and the $2.2 \times 10^7 - 5 \times 10^8$ ohm resistance-to-ground value exceed EOS/ESD and Department of Defense requirements.

Techni-Stat mats are available in a wide range of configurations, including rolls, and are available in blue, brown and gray. Each mat includes a 10-foot grounding cord with common-point hardware. All Techni-Stat products are made by leading manufacturers and offered by Techni-Tool at affordable prices, making them ideal for stretching tight budget dollars even further.

About Techni-Tool

Techni-Tool has been a leading supplier of tools and equipment for electronic production, assembly and repair for over 50 years.
