

Techni-Tool Adds ESD Precision Screwdrivers/Nutdrivers to Its Hand Tool Lineup

April 2011, Worcester, PA: Techni-Tool is pleased to introduce the newest additions to our growing family of products specially designed for use in electrostatic-sensitive environments.

Our new line of precision screwdrivers and nutdrivers offers ESD protection at the price of standard precision drivers. These ESD models include slotted, Phillips and Torx® screwdrivers, metric and inch hexdrivers, as well as metric and inch nutdrivers, all in a wide range of popular tip sizes. They feature conductive black/reflex blue handles that reduce the risk of damage from electrostatic discharge, and textured rubber grips for added comfort and precise control.

Each driver may be purchased individually, or you can get all 57 pieces in our Master Technicians Benchtop Precision ESD Screwdriver /Nutdriver Set (758SC200), conveniently packaged together with a transparent acrylic stand.

Get complete details on Techni-Tool ESD Precision Screwdrivers and all our products by contacting a Techni-Tool representative at 800-832-4866 or visit our website at www.techni-tool.com.
