

GO TO ANY LENGTH!

Everything you need to make
**CUSTOM LENGTH HDMI
CABLES IN THE FIELD.**

Tools for Field Terminating High-Definition Multimedia Interface

Now professional installers can make custom length, field-terminated HDMI® cables to connect audio/video sources (such as set-top boxes, DVD players, HD DVD players, Blu-ray Disc players, AVCHD camcorders, personal computers (PCs), video game consoles and AV receivers) to compatible digital audio devices, computer monitors, video projectors, tablet computers, and digital televisions. It's a practical alternative to the cable clutter and higher costs often associated with using pre-terminated cables. And Greenlee offers a full line of affordable products to help you get the job done right.
