

Tec-Cut Infinity Elite Cutters & Pliers Save You Money 2 Ways:

- 1. Save Now –**
priced lower than competing brands
- 2. Save Later –**
last longer with better performance

The Best Hand Tools You May Ever Use!

These new Swiss-made Infinity Elite pliers and cutters are the best we've made in the almost 30-year history of Tec-Cut Infinity hand tools. No other brand delivers this peak level of performance and durability for the price. Just look at all these features:

- **Unsurpassed performance for 100,000 cuts.** Infinity Elite cutters were computer tested against the 4 other leading manufacturers. The results?
 - Over the course of 100,000 cuts on the same part of the blade the force needed to open and close each cutter remained constant for Infinity Elite, but increased in 3 of the 4 competing brands due to blade damage and wear.
 - No blade damage or wear could be detected on the Infinity Elite tools even under 40X magnification visual inspection.
 - Infinity Elite cutter's master craftsmanship insures they will last as long as, if not longer than, the leading brands.
- **Lifetime Guarantee** against defects in materials or workmanship.
- **Exclusive 2-component fully dissipative handle** combines a soft surface for gripping with a hard plastic core for strength. This unique handle wears better and lasts longer than all ESD foam handles, plus is oil and grease resistant.
- **Special anti-fatigue design** developed through rigorous testing minimizes hand stress and allows hours of comfortable use.
- **Stainless steel dual-leaf springs** provide maximum resilience, flexibility and guarantee thousands of trouble-free openings and closings.
- **Matched bearing rings** minimize metal-to-metal contact between blades and extend tool life.
- **A lap joint blade design** joined with a steel screw keeps cutting edges in perfect alignment with less play far longer than tools connected with rivets.

- **Isothermal pre-hardening** of metal to 45 HRC before precision machining eliminates distortion and stress, guaranteeing the highest quality.
- **Pyrometer-controlled inductive hardening** to 63-65 HRC using proprietary equipment instills maximum strength and resistance to wear.
- **Highest quality ball-bearing steel** is used throughout the line for ultimate toughness.
- **31 styles** cover all the most popular flush, semi-flush and full-flush cutters and long, flat, round and snipe nose pliers. More styles to come during 2011.
