

# Trade in. Trade up. Save BIG!

Get 15% off a new Infiniivision 2000 or 3000 Series Oscilloscope when you trade in any 50 MHz scope from any vendor.

**Breakthrough technology gives you more of everything...except cost!**

Agilent's newest line of oscilloscopes delivers superior performance with optional capabilities and features unmatched by any other products in their class. And at prices designed to fit your budget.

**EDUCATORS SAVE 20%**

## YOU GET MORE:

**Space**—Infiniivision X-Series combines the capabilities of an oscilloscope, logic analyzer, and industry-exclusive function generator in a compact size ideal for benches where space is at a premium.

**Speed**—The 2000 series delivers up to 50,000 waveforms per second, and the 3000 up to 1 million—the industry's fastest update rate—so you see signal detail and infrequent anomalies more often.

**Memory**—The 2000 series has up to 100 kpts of memory—40 times more than other scopes—so you can capture long, non-repeating signals while maintaining a high sample rate. The 3000 series provides up to 4 Mpts of deep memory—without any of the deep memory hassles of other oscilloscopes!

**Agilent Technologies**

**Visibility**—The 8.5 inch WVGA display offers twice the viewing area with five times the resolution.

**Performance**—The 3000 series also offers 33 automated measurements, nine parametric triggers, six serial protocol triggers, as well as seven waveform math functions including FFT.
