

Agilent Technologies Buy the Best. Get Rewarded.

Get a FREE InfiniiVision DSOX3034A Scope

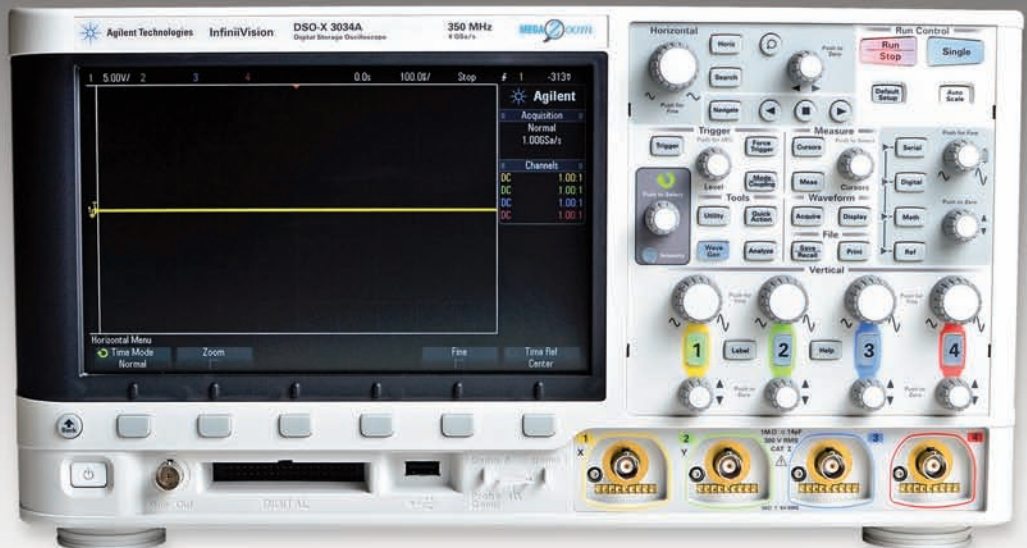

when you purchase a 1 GHz 7000B or any 9000 Series Scope.

7000 Series

9000 Series

DSOX3034A

BUY ONE OF THESE:

7000B Series Oscilloscopes

See more subtle analog, digital and serial signal details than ever before. With 4 channels, a 1 GHz bandwidth and unparalleled deep memory waveform update rates of up to 100,000 waveforms per second, you'll debug faster and never miss an infrequent event. Each model has a 12.1" XGA LCD display critical for displaying up to 20 channels simultaneously with series protocol. A 6.5" enclosure that weighs only 13 pounds provides better bench space utilization and portability.

- No. 431TE7104B DSO7104B\$15,466.00
- No. 431TE7105B MSO7104B\$19,500.00

OR ONE OF THESE:

9000 Series Oscilloscopes

Engineered for the broadest measurement capability, the versatile 9000 Series oscilloscopes are really 3 instruments in 1. Superior scope specs plus built-in logic and protocol analysis give you all the tools you need to view analog, digital and serial signals. Get meaningful insight into your design faster with more than 25 apps, including RS232/UART, I2C/SPI, CAN, FlexRay, USB and USB2.0, PCIe 1.1 and DDR.

TT No.	Model	Analog Bandwidth	Analog sample rate 4-channel/ 2-channel	Standard memory 4-channel/ 2-channel	Scope channels	Logic channels	PRICE

WITH PURCHASE

InfiniiVision DSOX3034A Oscilloscope

Complement your new 7000B or 9000 series oscilloscope with this 350 MHz, 4-channel model from Agilent's hot new InfiniiVision 3000 X-Series, which is redefining oscilloscopes with breakthrough technology. It provides up to 4 Mpts of deep memory—without any of the deep memory hassles of other scopes! The 8.5 inch WVGA display offers twice the viewing area with five times the resolution. You also get 33 automated measurements, nine parametric triggers, six serial protocol triggers, as well as seven waveform math functions including FFT.
