ST 1600 4-Zone Pre-heater

The most powerful and flexible pre-heating system available on the market today. Ideal for high mass, lead-free and other challenging PCBs, it features four 400-watt ceramic IR heaters for a total power output of 1600 watts. Each heater can be turned on or off independently and set to its own unique temperature, giving you complete control and flexibility. Fully programmable and password protected. Thermocouple accurately measures board temperature in closed-loop mode. Auto-off timer. Fits easily on any workbench. **Includes:** 12" x 16" capacity integrated PCB holder.

No. 612S0563\$2,250.00
